

Capiche is a web-based platform for public companies to take control of their private placements; reducing costs, ensuring compliance and simplifying administration.

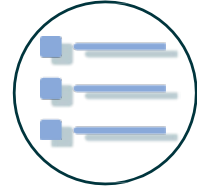

Reduce cost

Greater portion of proceeds available for furthering corporate objectives and creating shareholder value.

Ensure compliance

Compliance with applicable securities laws and stock exchange policies ensured.

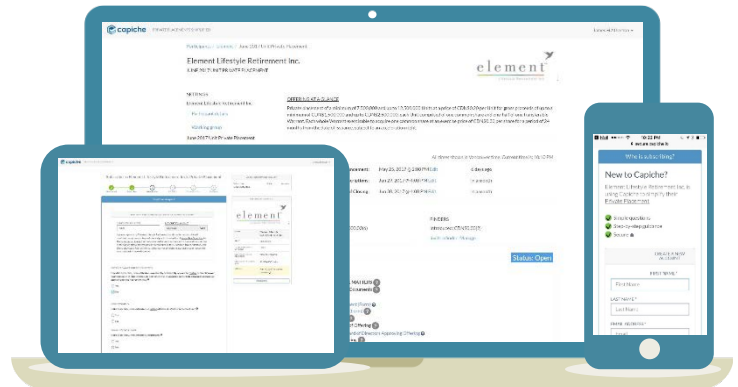

Simplify administration

Issuer understands and controls the process and subscribers easily complete their subscriptions.

Streamline your private placement process

Securities laws and stock exchange policies are constantly changing and increasingly complex yet private placements continue to be completed using a paper-based manual process. As a result, significant time, expense and expertise are required to undertake and complete a private placement.

Capiche provides issuers a secure web-based platform that brings the private placement process online. Capiche guides users through the process, automatically generates all required documentation and facilitates interactions between the issuer, subscribers and other participants.

What customers are saying

"Capiche provided a real-time summary of all received subscriptions received, putting us in full control of our private placement."

"We closed our private placement confident that it was completed in compliance with complex and ever-changing securities laws and stock exchange policies"

"Our investors found completing on-line subscription agreements through Capiche to be straight-forward."

"I have no hesitation in recommending the Capiche platform to others who wish to save time and money on their next private placement financing."

We're looking for issuers who want to take control of their private placements and complete them quickly and efficiently.
